

Services Overview

Guardian Network Gateway Security

All in one managed security protecting your business from digital threats

Protecting business IT just got easier. Lixel Systems Ltd.' Guardian Network Gateway Security consolidates all security functions under a single subscription service. Dead simple, around-the-clock protection delivered by a single vendor.

Multiple threats, one solution

Five core security functions in a single service: firewall, antivirus and spam filtering, intrusion detection, content filtering, and VPN capabilities.

- Stay ahead of emerging threats, effortlessly
- Simplify security – a single security expert replaces point solutions and multiple vendor management
- Cost effective month-by-month subscription service
- Protection guaranteed by service level agreement
- Superior protection without degraded network performance

Key service features

Lexel Systems Ltd.' Guardian Network Gateway Security offers customers an integrated ready-to-go service for a fixed monthly fee. Multiple security layers are delivered as a single automated service.

- **Firewall security** - Full-inspection application proxy technology and automated systems hardening
- **Antivirus and spam filtering** – Automated detection and capture of malicious viruses, worms, trojans and spam
- **Intrusion detection** - Intrusion detection automatically arrests network attacks
- **Content filtering** - URL filtering restricts access to inappropriate websites
- **VPN** – Application and network traffic monitoring plugs all potential VPN security holes
- **Automated management** – Network configuration and setup, patching and updates, reporting, and rapid response replacement

Buy preconfigured, or customise to get the precise range of features and flexibility your business needs. Either way, you get a one-stop security service providing multifaceted around-the-clock protection.

One customer's view

“ Lexel Systems Ltd. did a great job at designing and implementing our business critical firewall at Matrix Funding Group. Security and up time for us is critical; when you are in the financial services industry you need a robust and water tight solution. More so, any security solution is only as good as the technical specialists that configure and monitor it, and that's why we use Lexel Systems Ltd..” **David Gibson - General Manager - Business Solutions**
