

BACKUP & DISASTER RECOVERY

PEACE OF MIND FOR YOUR BUSINESS

Whether data loss is attributed to hardware failure, a natural disaster, accidental or intentional deletion, Lexel can get your business up and running again quickly - with minimal disruption.

Delivering peace of mind for your business, the knowledgeable backup and disaster recovery team at Lexel can help with services and solutions to protect your data, system, files and applications.

Our services include:

Managed Service. Lexel's cloud based "backup as a service" is affordable, secure and reliable. With no capital expenditure; monitoring, reporting, support and software licensing is all delivered for a simple monthly fee.

Assessment. Lexel delivers valuable business insight by reviewing your organisation's backup and disaster recovery requirements. Receive a comprehensive report outlining the risks that your business may be exposed to, in the event of a disaster or data loss.

Planning. Lexel delivers a backup and disaster recovery solution to meet your organisation's needs. Our knowledgeable team will work with you to understand Recovery Point Objectives (RPO), Recovery Time Objectives (RTO), support requirements and budget constraints.

Support. Customers can rely on Lexel's commitment to service excellence, every time. Through an experienced and dedicated New Zealand based helpdesk, Lexel supports customers across both New Zealand and Australia. Specialist backup and recovery support is delivered 24 x 7, 365 days a year.

Self-Service. If your organisation requires the best backup and disaster recovery solution but want to manage yourself that's no problem. We'll do the initial heavy lifting, then provide your team with access to the training and support you need to manage it yourself.

BUSINESS BENEFITS

Lexel's cloud based *backup as a service* delivers the following business benefits:

Reliable. Once your data is backed up in the cloud, your backup occurs on time, on schedule. Instantly restore data regardless of your location.

Affordable and Secure. Your data is securely backed up to the cloud for a simple monthly fee, with no capital expenditure.

Peace of mind. Backups are implemented to best practice standards, then managed and monitored by Lexel's team of dedicated backup experts.

Compliance. With data stored in the cloud, it's easily accessible for legal and compliance requirements.

Accessible. With instant recovery, users can access work information where, when, and how they want to.

Efficient. Reduce ongoing network utilisation, with only incremental changes backed up.
