LEXEL™

CITRIX SERVICES & SOLUTIONS

ANYTIME, ANYWHERE, ANY DEVICE

The experienced team at Lexel can assist with the design, consultation, implementation, integration, maintenance and support of your entire Citrix environment.

At Lexel, we deliver Citrix solutions that meet your business requirements, from one-off projects to a fully managed service. With Lexel as your Citrix partner, have confidence that your data and applications are secure and easy to access, anywhere, at any time, and on any device or network.

Our services include:

Microsoft Skype for Business. Lexel can deliver Skype for Business, as a virtual application or within a virtual desktop, with the same performance as a local installation.

Microsoft Windows 10 migration. Lexel can help simplify your migration to Windows 10, centralising the delivery of new Windows 10 virtual desktops to employees.

Managed services. Delivering tailored solutions, Lexel can proactively maintain and support your entire Citrix infrastructure.

Design and implementation. The team at Lexel can help your business manage end-to-end Citrix implementations. Our services include packaging and deployment of applications, virtual desktops and remote access, on the platform of your choice.

Consulting and projects. Whether a one-off or ongoing project, Lexel can assist with your Citrix consulting and project needs.

Citrix cloud management platform. The team at Lexel can eliminate manual integration between all Citrix services and technologies through one cloud management platform.

Procurement. Lexel's software licensing experts can assist your business with Citrix licensing, whether on-premises or cloud.

BUSINESS BENEFITS

Reduce costs. Save time and money through centrally managing applications and desktops.

Flexibility. Deliver Windows, Linux, web and SaaS applications, or full virtual desktops from any cloud, public, on premises or hybrid.

Mobility. Enable your users to work from anywhere. Connect full virtual desktops, Windows, Linux, and SaaS apps to any device, utilising Azure or Amazon web services.

Productivity. Reduce costs and provide secure remote access to employees, increasing employee productivity.

Security and compliance. Deliver remote access while addressing privacy, compliance, and risk management mandates.

Simplified IT. Reduce IT complexity by centralising application and desktop management and automating common tasks.
