

MANAGED SERVICES

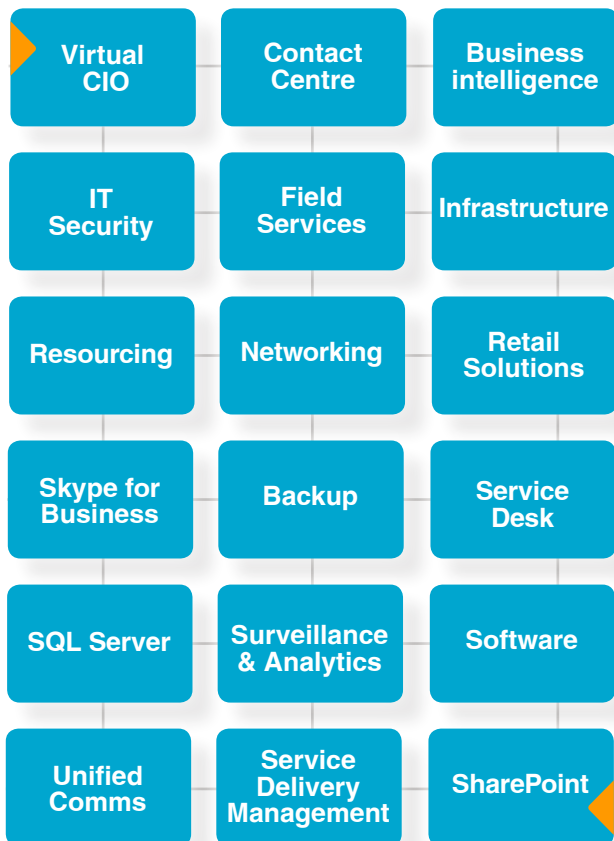

LEVERAGING LEXEL'S EXPERTISE FOR GREATER ROI

Rather than trying to keep pace with technology or hire experts in-house, the team at Lexel offer a range of ICT managed services to help support your business.

Managed services can add value and reduce cost for businesses of any size. Our experienced team will help define your unique requirements, ensuring they are clearly aligned with your business outcomes.

With extensive expertise, Lexel's managed services enable you to leverage our strong vendor partnerships and buying power, as well as our in-house specialists, methodologies and processes.

Taking a holistic approach, Lexel offers tailored managed services across our entire range of services & solutions:

BENEFITS

Access to broad expertise. You're not hiring just one employee, you're taking advantage of the expertise of an entire company.

Reduced risk. Leverage our broad industry knowledge in areas such as compliance and security.

Operational efficiencies. Managed services provide the total package of people, process and technology.

Control costs. Fixed monthly costs provide financial predictability, scaling with your business growth.

Remain focused. Stay focused on your business needs and let us focus on your IT needs.

Service levels

Lexel Managed Services are available in three different levels; each service uniquely designed to meet your business needs, budget and SLA requirements.
