

MICROSOFT CLOUD SOLUTIONS

ENABLING SUCCESS IN A DIGITAL WORLD

A Microsoft partner since our inception, Lexel is one of the most highly regarded Microsoft Gold partners in New Zealand. With over 30 years in business, Lexel's commitment to service excellence is demonstrated through customer retention and impressive growth.

Delivering exceptional Microsoft services, solutions and support, Lexel's extensive Microsoft cloud practice team includes a wealth of expertise and capability, delivering peace of mind for your organisation's Microsoft cloud journey.

Microsoft Office 365. Productivity applications for the modern workplace.

Microsoft Skype for Business. Messaging, conferencing, online meetings and collaboration as part of Office 365.

Microsoft Azure. Cloud services built, deployed, and managed through Microsoft's datacenters.

Microsoft SharePoint Online. Store, sync and share work files in the cloud.

Microsoft Teams. Brings together people conversations and content.

Microsoft Exchange. Business email, calendar and contacts on your PC, phone and browser.

Microsoft Yammer. A private social network for connecting people & sharing information.

Microsoft Power BI. Business analytics tools to analyse data and share insights.

Microsoft OneDrive for Business. For businesses that need file sharing and storage.

Our services include:

Readiness and Migration. At Lexel, we work with our customers to see the big picture, so you'll have the added advantage of clearly understanding the benefits and the risks associated with moving workloads to the cloud.

With literally hundreds of successful Microsoft cloud migrations under our belt, you can rely on Lexel's experienced team to implement Microsoft cloud solutions to global best practice standards.

Managed Services. Leverage our strong vendor partnerships and buying power, as well as our in-house specialists, methodologies and processes.

Support. Our team of Microsoft experts are available to deliver superior remote or onsite Microsoft support, nationwide, across a range of Microsoft cloud services and solutions.

Service desk. On call 24 x 7, our local service desk will not only fix your Microsoft problems, they'll identify the cause, preventing it from happening again.

Professional Services. Whether you'd like Lexel to manage your entire Microsoft cloud project or a specific component of it, our knowledgeable team can accommodate your unique requirements.

Skype rescue. With a significant number of corporate customer rescues under our belt, our team specialises in resolving Microsoft Skype for Business challenges resulting from failed deployments and/or undiagnosed network issues.

Hosting. Hosted in our own local data centre or bespoke hosting, pick from one of four geographically distributed data centres to compliment global cloud providers, our solutions can be tailored to meet your business needs around governance and compliance.

Licensing and management. An established Microsoft Cloud Solution Provider (CSP) with EA license partnerships, our knowledgeable team can license, provision, manage and support your Microsoft cloud solutions.

Microsoft Planning Services. For eligible volume licensing customers, Lexel is certified to deliver four Microsoft Planning Services: Desktop, Skype for Business / Exchange, SharePoint & Public Cloud and Azure.
