MICROSOFT SQL SERVER
MANAGED SERVICES

Lexel's dedicated team of Microsoft SQL Server specialists offer a broad range of services to meet all your modern data platform requirements.

Reducing risk while optimising your SQL environment can be costly. Avoid large or lumpy infrastructure costs through Lexel's managed services, customised to your environment and unique business needs.

Included in Lexel's managed services solutions, you will have access to our experienced and professional team of database administrators (DBAs); some of the best resources in the industry.

Virtual DBA

A good DBA with the right experience is hard to find. Through Lexel's virtual DBA service, your organisation has access to our team of highly experienced DBAs for as many or as few hours as you require.

Accessing the skills, tools, and support that you need, our team can take care of all your modern data requirements, from operational database tasks to identifying and fixing potential problems before they escalate into issues.

With your SQL environment in safe hands, your team can concentrate on what matters most to your business.

Our partners

Collaborating with industry-leading partners within the Modern Data space, Lexel offers SQL Server security audits, performance monitoring and maintenance second to none.

Our Managed Services include:

SQL performance as-a-service. When the best is the only option, Lexel offers continuous optimisation to help support your SQL workloads (under your existing change control process).

SQL compliance as-a-service. When compliance is part of your risk mitigation and audit requirements, Lexel can help by providing valuable insight, while protecting your organisation's critical data.

High availability disaster recovery as-a-service. Turn your SQL infrastructure spend into OPEX. A cost-effective way to embark on upgrades and new implementations without having large or lumpy project costs.

Monitoring as a service. When databases fail, your business can grind to a halt. Our tools allow us to detect the early warning signs before they escalate into issues.

24 x 7 x 365 support. Lexel's experienced New Zealand based team offers mission-critical support, when and where you need it.

Other services include:

Security & compliance. Lexel can help protect your data with robust security and compliance services, solutions and support.

Health & performance. Gain valuable insight, reduce risk and improve performance of your data platform.

Backup & restore. Protect your business-critical data with a reliable, cost-effective backup & restore strategy.
