

# MICROSOFT TEAMS

## MEETING ROOM SOLUTIONS

**Collaboration experts Lexel Systems offer a unique blend of Microsoft expertise and audio-visual solutions, transforming meeting rooms, team collaboration spaces and boardrooms.**

From the initial network feasibility assessment, to room design and installation, hardware to training, project management to support; Lexel's experienced collaboration team provides complete meeting room solutions.

Lexel delivers a quality meeting and a rich, collaborative meeting room experience, ensuring your organisation's meeting room solutions are simple to use and work every time - without fail.

### Teams meeting rooms

**Microsoft Teams revolutionises meetings and meeting rooms through:**

**User experience.** Consistent and familiar meeting experiences from your meeting room, including for those accessing remotely from a PC, Mac or mobile.

**Collaboration.** Work on documents in real-time with your meeting integrated Office 365 applications.

**Reliability.** Adaptive, resilient audio and video, even over limited bandwidth.

**Transcription.** Record then play back meetings, and search for important items in the transcript.

**Translation.** Live captions and subtitles, for a number of languages.

**Security.** Includes enterprise-grade security, compliance and manageability.

**Branding.** Brand company meetings and video experiences with custom, corporate backgrounds.

**Live events.** Schedule, produce and broadcast meetings and events for up to 10,000 attendees.

### Our services include:

**Assessment.** A formal Microsoft meeting rooms assessment will help you decide on the best strategy and solution based on your business priorities.

**Consulting.** Access a wide range of expertise, from Microsoft Certified Professionals through to audio-visual specialist engineers and consultants.

**Network readiness.** Our team can ensure your network is configured correctly, optimised for your meeting room solution.

**Project management.** Our experienced team will manage the entire meeting room project end-to-end keeping you informed every step of the way.

**Room design.** Whether it's a simple plug and play system or a fully customised room design including acoustics, lighting and furniture recommendations.

**Supply and installation.** Lexel can supply and install your meeting room solution from end-to-end, so you only have one partner to deal with.

**User adoption and training.** Administration and user training, in-room cheat sheets, and customised video-based training assets.

**Certified devices.** A range of Microsoft Teams certified devices are available in every size, for every space and designed for every working style. Get expert guidance on the best devices for your organisations needs.

**Microsoft licensing.** Ensure your Microsoft Teams solution is optimally licensed, with the help of our experienced, highly regarded Microsoft software licensing team.

**Support.** Through our 24x7 local NZ service desk, access post-installation support, scheduled maintenance and monitoring - with SLAs to meet your organisation's support needs.

## Microsoft Teams Rooms

**Microsoft Teams Rooms (MTR) simplifies the meeting room experience for both Microsoft Teams and Skype for Business.**

MTR provides a simple meeting room experience with one-touch join, content sharing and centre of room control. MTR is scalable from small to large rooms with its various audio and video options.

### Small rooms (up to 8 seats)

Designed for small rooms such as focus or huddle rooms; this configuration minimises cabling and saves space with an all-in-one camera, speaker, and microphone.

### Medium rooms (8-12 seats)

Designed for medium sized rooms; this configuration includes dedicated camera, speaker, and microphone.

### Large rooms (12+ seats)

The large configuration builds on the medium room, adding an additional speaker and microphone to ensure coverage.

## Microsoft Surface Hub

**Lexel can help you turn any space into a teamwork space - with the Surface Hub 2S.**

Be seen, be heard, and actively participate in the group discussion with best-in-class technology. Remote meetings and ad-hoc calls run seamlessly with Microsoft Teams or Skype for Business.

Videos look clear and crisp on a brilliant, 4K+ high resolution touch screen with amazing graphics performance.

Where Surface Hub really shines is its beautiful touch and pen experience; in particular the 2-way white board sharing allows remote teams to seamlessly share ideas.

## Collaboration Bars

Collaboration Bars for Microsoft Teams provide a cost-effective way to enable smaller meeting spaces. Collaboration Bars are purpose-built for smaller meeting spaces like focus rooms, huddle spaces and conference rooms and are designed for one to five people.

The all-in-one units are quick and easy to install, typically attached directly to the TV screen.
