

BACKUP AND DISASTER RECOVERY

PROTECT YOUR DATA, REGARDLESS OF ITS LOCATION

Lexel's dedicated team of backup and recovery experts provides peace of mind; ensuring your data is safe, secure, backed up and available when you need it - regardless of where it's located.

Through an affordable monthly managed service, our experienced team can provide a plan for business continuity and disaster recovery that's second to none.

Be confident of shielding your data, protecting your business, and keeping your systems available and reliable no matter what happens.

We'll help you:

- Understand your vulnerabilities
- Safeguard against risks
- Increase your data security
- Reduce the impact of cyberattacks to your organisation
- Prepare for the worst possible business disruption

Our solution includes:

-  All licenses and hardware
-  24 x 7 monitoring of your backup solution
-  Local support and NZ helpdesk
-  Annual recovery test for names servers/devices
-  5 x free restores a month
-  Security built-in redundancy, geo-replication and encryption

BUSINESS BENEFITS

100% OPEX with easy monthly payments.

No vendor lock-ins. Secure backups without lock-ins or proprietary file systems.

Backup and recovery on your terms. Direct and secure backup, copy and archival to nearly any cloud or on-premise object storage. Choose from a range of backup and granular recovery options to suit your organisation's unique business needs.

Proactive monitoring and analytics. AI-driven infrastructure monitoring and diagnostics providing complete visibility for ransomware detection and protection.

Automated remediation. Unexpected issues for your critical backup and DR processes are remediated as they occur.

Intelligent automation. Machine learning based diagnostics and remediation actions, helping resolve issues faster.

Data Security. Private cloud backup location with built in redundancy, geo-replication, multi-factor authentication (MFA), passwordless service accounts and encryption to fortify your defences against cyberattacks.

Trusted Immutability. Ensure that your backups can always be restored after a cyber-attack with comprehensive, enterprise grade immutability options.

Hybrid cloud optimized. Cloud-native application-aware backup agents and unified cloud monitoring and reporting.

Cyber Resiliency. Enable the fastest response to ransomware attacks by actively detecting threats and malicious behaviour before restoring with clean data.

Governance and compliance. Ensure security, compliance, and privacy requirements. Supports FIPS 140-2, SOC Type 2 and ISO27001 certifications
